Multidisciplinary Introduction to Research (EDF 2910) 1 credit

Students will develop transferrable skills in primary literature search and analysis and refine their interests through a guest researcher series to explore research through the lens of multiple disciplines. As groups, students will put these skills into practice by leading a journal club-style discussion of their research paper analysis.

Friday 9 AM, 10 AM, or 1 PM (Boca Raton)
Friday 11 AM (Jupiter)

RI: Multidisciplinary Research Methods 2 (EDF 3912) 1 credit

This course supports students engaged in faculty-mentored undergraduate research as they work on projects, grants, presentations, and publications. Students will learn to write grant proposals and research abstracts, find and apply for grants to fund their project ideas, and will gain experience presenting their proposed research.

Thursday 11 AM or Friday 12 PM (Boca Raton)
Friday 9 AM or 10 AM (Jupiter)

For questions, please contact us:
